

GRIFFIN GEORGIA KENNEL CLUB

TUESDAY, MAY 19, 2009

President: Walt Sanderson – V. Pres: Jo Gahm – Secretary: Tammy Sasso – Treasurer: Sue Yates
Board Members: Lois Milligan-Noel Clarke-Willie Crawford

Next Meeting:
May 19, 2009
Ryan's Steakhouse
1323 N. Expressway
Griffin, GA
770-233-3326

General Meeting: 7:30

Board Members: No Board Meeting this month

The Prez Sez

"Members, come to Ryan's and eat with us before the meeting. Good way to get to know everyone!"

Notes from your editor:

No program this month. Please plan to attend anyway, because we need us all there so we can firm up plans for the month.

Following the minutes in this newsletter is a little bit of humor for all you folks. Definitions of words may be different from what you expect, but if you are a handy-man/woman around the house, you will understand and appreciate the humor of this article.

Willie

Griffin Georgia Kennel Club

Meeting Minutes

April 21, 2009

Walt called the meeting to order at 7:12 P.M.

Secretary's Report

Willie moved that we accept the minutes from the last meeting and Helen seconded the motion. The minutes were approved. Tammy read a thank you note from Julie Kornder who received our donation to UGA. Tammy also mentioned an email from AKC allowing mixed breeds to participate in performance activities. We may need to discuss this new rule at a later time.

Treasurer's Report

Due to Sue's absence, there was no treasurer's report.

Old Business

Walt thanked Willie for the great job she is doing on the newsletter. He also discussed the need for a new show chairman.

New Business

Lois reminded everyone to send in your paperwork if you are applying for an award in 2008.

Our speaker Elizabeth Barrett from the Caring Canine Rehabilitation Center asked if we would consider donating to the Registered Vet Tech Scholarship. Ft. Valley, Gwinnett Tech, and Athens Tech all have programs. Elizabeth would also like to judge the working group at one of our matches.

There is a Humane Society Fund Raiser at the Bailey Tebault house Saturday night from 5 -7 P.M. The entry fee is \$20 and there will be many dog contests. The Hound and Puss is also selling raffle tickets.

At 7:30, Willie moved we adjourn the meeting so our speaker could begin. Tammy seconded the motion.

Members present: Tammy Sasso, Duane Sasso, Helen Sanderson, Walt Sanderson, Deb Van Huss, Chase Todd, Kelly Burge, Willie Crawford, Chuck Crawford, Lois Milligan, Debbie Yelvington, Noel Clark, Walter Jung

A LITTLE NON-DOG-RELATED HUMOR:

TOOLS!!! (A Classic)

A very accurate description of common garage tools! If you've used these tools you know exactly what it is describing.

DRILL PRESS:

A tall upright machine useful for suddenly snatching flat metal bar stock out of your hands so that it smacks you in the chest and flings your beer across the room, denting the freshly-painted part which you had carefully set in the corner where nothing could get to it.

WIRE WHEEL:

Cleans paint off bolts and then throws them somewhere under the workbench with the speed of light. Also removes fingerprints and hard-earned calluses from fingers in about the time it takes you to say, "What the...??"

ELECTRIC HAND DRILL:

Normally used for spinning pop rivets in their holes until you die of old age.

SKILL SAW:

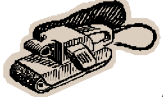

A portable cutting tool used to make studs too short.

PLIERS:

Used to round off bolt heads. Sometimes used in the creation of blood blisters.

BELT SANDER:

An electric sanding tool commonly used to convert minor touch-up jobs into major refinishing jobs.

HACKSAW:

One of a family of cutting tools built on the Ouija board principle. It transforms human energy into a crooked, unpredictable motion, and the more you attempt to influence its course, the more dismal your future becomes.

WISE-GRIPS:

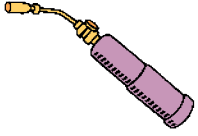

Generally used after pliers to completely round off bolt heads. If nothing else is available, they can also be used to transfer intense welding heat to the palm of your hand.

WELDING GLOVES:

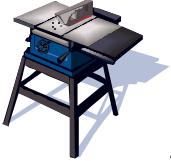

Heavy duty leather gloves used to prolong the conduction of intense welding heat to the palm of your hand.

OXYACETYLENE TORCH:

Used almost entirely for lighting various flammable objects in your shop on fire. Also handy for igniting the grease inside the wheel hub you want the bearing race out of.

TABLE SAW:

A large stationary power tool commonly used to launch wood projectiles for testing wall integrity.

HYDRAULIC FLOOR JACK:

Used for lowering an automobile to the ground after you have installed your new brake shoes, trapping the jack handle firmly under the bumper.

EIGHT-FOOT LONG YELLOW PINE 2X4:

Used for levering an automobile upward off of a trapped hydraulic jack handle.

E-Z OUT BOLT AND STUD EXTRACTOR:

A tool ten times harder than any known drill bit that snaps neatly off in bolt holes thereby ending any possible future use.

BAND SAW:

A large stationary power saw primarily used by most shops to cut good aluminum sheet into smaller pieces that more easily fit into the trash can after you cut on the inside of the line instead of the outside edge.

TWO-TON ENGINE HOIST:

A tool for testing the maximum tensile strength of everything you forgot to disconnect.
